

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO):

(statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety

Name and Signature of Student and Date

(Signature and Date in Handwritten)

Session	2024-25 (ODD)	Course Name	Web Technology Lab
Semester	3	Course Code	23CT1301
Roll No	10	Name of Student	Ekavira Vinod Dawale

Practical Number	Practical 2
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.
Aim	To create a student registration form using HTML tags.)
Problem Definition	The aim of this Practical is to create a simple Student Registration Form using HTML tags. The form will allow a student to enter basic information such as name, email, password, Age.
Theory (100 words)	HTML provides different tags for creating forms. The tag is used as the main container of a form. The tag is used to take different types of user input such as text, email, password, Age. The and tags are used to create a dropdown list. The tag is used when the user needs to enter larger text such as an address. <!--EndFragment--> </body> </html>

Procedure and Execution (100 Words)	Step for Implementation: 1. Open VS Code or Notepad. 2. Create a new file and save it 3. Create the basic HTML structure using 4. Add a heading for the Student Registration Form. 5. Create input fields for student name, email and password. 8. Create a dropdown menu for selecting the Age. 10. Add Submit and UNDO buttons. 11. Save the file. 12. Open the HTML file in a web browser and check the form.
-------------------------------------	---

```
Code:<!DOCTYPE html>
<html>
<head>
  <title>Registration Form</title>
  <link rel="stylesheet" href="deco.css">
</head>

<body>

<center>
  <h2>Registration Form</h2>

  <form onsubmit="return validateForm()">

    <label>Full Name:</label>
    <input type="text" id="name">
    <br><br>

    <label>Email:</label>
    <input type="email" id="email">
    <br><br>

    <label>Password:</label>
    <input type="password" id="password">
    <br><br>

    <label>Mobile:</label>
    <input type="text" id="number">
    <br><br>

    <label>Age:</label>
    <input type="number" id="age">
    <br><br>

    <input type="submit" value="REGISTER">
    <input type="reset" value="UNDO">

  </form>
</center>

<script>
function validateForm() {

  let name = document.getElementById("name").value.trim();
  let email = document.getElementById("email").value.trim();
  let password = document.getElementById("password").value;
  let number = document.getElementById("number").value.trim();
  let age = document.getElementById("age").value;

  // Name validation
  if (name == "") {
    alert("Please enter your name");
```

```

        return false;
    }

    // Email validation
    let emailPattern = /^[^\s@]+@[^\s@]+\.[^\s@]+$/;

    if (!emailPattern.test(email)) {
        alert("Please enter a valid email address");
        return false;
    }

    // Password validation
    if (password.length < 6) {
        alert("Password must be at least 6 characters long.");
        return false;
    }

    // Mobile number validation
    let phonePattern = /^[0-9]{10}$/;

    if (!phonePattern.test(number)) {
        alert("Phone number must be 10 digits");
        return false;
    }

    // Age validation
    if (age == "" || age < 16 || age > 60) {
        alert("Age must be between 16 and 60.");
        return false;
    }

    alert("Student Registration Successful!");
    return true;
}
</script>

</body>
</html>

	Output: 
Output Analysis	The Student Registration Form was created successfully using HTML form tags. Different types of input fields were used according to the type of information required.
Link of student Github profile where lab assignment has been uploaded	dawaleekvira/Web_Technology
Conclusion	. Thus, a simple Student Registration Form was successfully created using HTML. This Practical helped in understanding the use of different HTML form elements and how they are arranged to collect information from users.
