

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.	Mission: Means to achieve Vision
---	---

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation pronounce as Pep-si-IL easy to recall
PEO2	Core Competence	E: Environment (Learning Environment)	
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning Environment	L: Breadth (Learning in diverse areas)	

Program Outcomes (PO):

(statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

“I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life.” to contribute to the development of cutting-edge technologies and Research.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry-institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session	2024-25 (ODD)	Course Name	Web Technology Lab
Semester	3	Course Code	23CT1301
Roll No	10	Name of Student	Ekavira Vinod Dawale

Practical Number	Practical 3
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.
Aim	Develop and demonstrate the usage of inline, internal and external style sheet using CSS.
Problem Definition	To develop a simple web page and demonstrate the use of inline, internal and external CSS for changing the appearance and style of HTML elements.
Theory (100 words)	CSS stands for Cascading Style Sheets. It is used to make HTML webpages look better by changing their colour, font, size, spacing, background and other properties. 1. Inline CSS CSS is written directly inside the HTML element using the style attribute. 2. Internal CSS CSS is written inside the <style> tag inn the <head> section of html. 3. External CSS CSS is written in a separate file . css file and connected to the HTML file using the tag. External CSS is useful when the same styling needs to be applied to multiple webpages

Procedure and
Execution (100

Words)

Step for Implementation:

1. Open VS Code or any text editor.
2. Create a folder named web_Practical.
3. Inside the folder, create an HTML file named form.html. 4.
- Create another file named demo.css.
5. Write the basic HTML structure in form.html.
6. Apply inline CSS to one HTML element using the style attribute.
7. Write respective code in the given files.
8. Add some CSS properties in the external CSS file.
10. Save both files.
11. Open form.html in a browser.
12. Observe the different styles applied to the webpage.

code:

Code for HTML is same as practical 2

The given code is of CSS

/* Minimalist Registration Form - Original Styling */

```
* {  
  box-sizing: border-box;  
  margin: 0;  
  padding: 0;  
}
```

```
body {  
  font-family: Arial, sans-serif;  
  background-color: #f4f6f8;  
  color: #263238;  
  min-height: 100vh;  
  display: flex;  
  justify-content: center;  
  align-items: center;  
}
```

```
center {  
  background-color: #ffffff;  
  width: 420px;  
  padding: 35px 40px;  
  border-radius: 12px;  
  box-shadow: 0 8px 25px rgba(0, 0, 0, 0.08);  
}
```

```
}

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Output:

Output Analysis

The webpage was successfully created using all three types of CSS. Inline CSS was applied directly to the main heading. Internal CSS was used to style the subheading

Conclusion	Thus, the usage of Inline, Internal and External CSS was successfully demonstrated. The practical helped in understanding how CSS can be used to change the appearance and layout of an HTML webpage. External CSS is especially useful when the same design needs to be used on multiple webpages.
